

How to do we care of chickens

In Sri Lanka me and my friend had a chicken

My friend had 8 chickens in different colors. The colors are yellow, black And white.

I had 6 chickens in yellow and white colors.

I keep my chickens in some small houses.

My friend keeps his chickens in coop.

Chickens live in coops or small houses.

Sometime my chickens get sick I them some maidens she will be alright.

If she is hungry she will find some food in ground. If I see that I will give her chicken food

Sometime I open the gate of the small house and she will run away or she will come to me.
